COMMITTEE OF EXPERTS ON THE
TRANSPORT OF DANGEROUS GOODS

Sub-Committee of Experts on the
Transport of Dangerous Goods
(Fifteenth session,
Geneva, 29 June-10 July 1998)

DRAFT AMENDMENT TO THE MODEL REGULATIONS

Chapter 3.2: Dangerous goods list

New UN number for Rockets with inert head

Transmitted by the expert from Norway

1. Introduction

Norway has recently tested a new type of practice rocket with inert head that showed 1.2C properties in the Test series 6(c).The only available entry for "Rockets with inert head" in the present Recommendations is UN No. 0183 in division 1.3C.

As of today there are no other possibilities open to us than to classify this rocket as "UN 0281 Rocket motors" or "UN 0466 Articles, explosive. n.o.s.", neither of which we feel are quite appropriate, since there already exists a separate entry for this type of explosive article with a different classification.

2. Proposal

Introduce in Chapter 3.2 of the Recommendations a new UN number:

(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
05XX	ROCKETS with inert head	1.2C				NONE	130			

3. Consequentials

If this proposal is taken, the following consequential amendments are necessary:

In "**ALPHABETICAL INDEX OF SUBSTANCES AND ARTICLES**", at the name "Rockets with inert head" add: 1.2C 05XX

Under the heading "PARTICULAR PACKING PROVISIONS OR EXCEPTIONS" in Packing Instruction 130 add at the end of the list of UN numbers: 05XX
